confidence*

Suret Myburgh - Client

DR. GERDA JOUBERT ON KINDERKINETICS

Dr. Joubert has ran a very successful Biokinetics practice in Springs for over 30 years

"Kinderkinetics Takes a scientific approach to a child's development, without removing 'being a child', by learning through play"

MORE FROM DR. GERDA JOUBERT

'The way the KK incorporated aquatic therapy speaks of a willingness and eagerness to expand their knowledge in techniques that leads to the benefit of their clients.

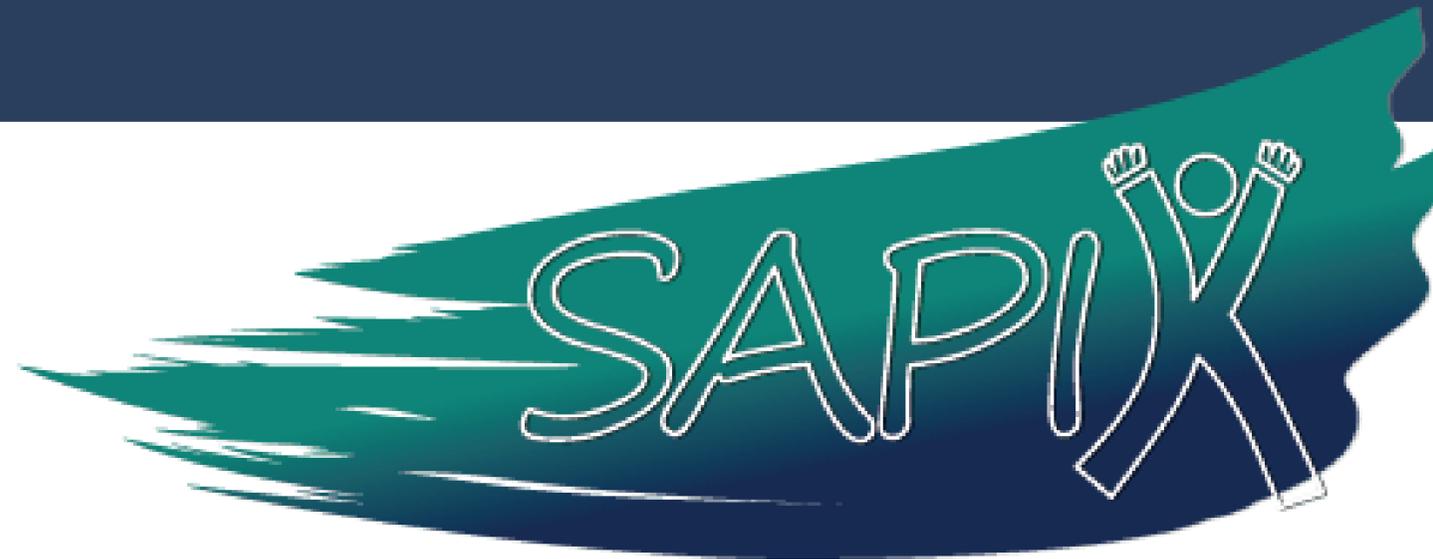

KK forms part of a multi-disciplinary team involved in the maintenance, development, and improvement of human movement, with specific reference to the development of the child. The scientific based programs developed by the KK impacts positively on the developmental phases of the child.

'A child learns through play', it is said. Observing the KK in action I could see the solid scientific based programs behind the structured play implemented by the KK without losing the play and fun element for the child. "

ANDREIA CAPDEVILLE - SPEECH THERAPIST

" It was of great benefit to work with Kinderkinetics in a multidisciplinary team. They are Professional and understand working towards the total well-being of motor development and functional growth in children"
